

Amnet eLPO works as an extension of your team. Our experienced litigation support professionals offer a comprehensive list of services. With a proven track record that leverages information technology, we continue to exceed client expectations.

THE NEED

A leading discovery solutions partner won a large bibliographic coding project for an Oil & Gas Company relying on Amnet eLPO's off-shore team's capability.

2 Million pages, custom LDD, extensive coding fields and a sharp deadline.

THE SOLUTION

An experienced core team broke down the project into easier modules which helped the separate teams contribute towards meeting the deadline with substantial productivity rates.

A dedicated quality control team along with customer's tech team, helped get the data ported to required database servers as per expected priority to help the client carry out review process in tandem.

ADVANTAGE

The client was in a position to complete a significantly large coding assignment along with LDD within expected time frame from a single vendor. Working with prioritized volumes in tandem with the off-shore coding partner helped the client, initiate review activity much before than expected go-live date.

Team's foresight to identify issues around prioritized tasks and flexibility in terms of incorporating last minute changes was well appreciated.

Amnet eLPO Advantage

*Your competitive
edge in evidence
management*
